Mill the grains and dough-in with 17.25 quarts (16.3 L) of strike water, for a mash ratio of about 1.25 quarts per pound of grain (2.6 L/kg). Target a mash temperature of 150 °F (66 °C) and hold for 60 minutes. Sparge with 170 °F (77 °C) water. While the runnings are being collected, add your first wort hop addition. Collect approximately 7 gallons (26.4 L) of wort runoff and bring to a boil. The goal is to get 5.5 gallons (21 L) into the fermenter. Add the Irish moss with 15 minutes left in the boil. Add the first charge of Amarillo® and Citra® hops with 5 minutes left in the boil.

After the 60-minute boil, chill the entire wort down to 185 °F (85 °C) and add the whirlpool/hop stand addition of hops and let the wort rest for 45 minutes with the lid on. Once the whirlpool/hop stand is complete, chill your wort to yeast pitching temperature.

Pitch your yeast as a 1.5-L yeast starter and ferment at 64-70 °F (18-21 °C). Fermentation should take 10-14 days. Following fermentation, dry hop for five days before bottling or transferring to keg. Prime to 2.3 volumes of CO2.
